## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Objections*

Claim 1 is objected to because the preamble recites tope wherein it appears to be a misspelling of the recitation top. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Brenner (US 4,642,908). Brenner is considered to disclose the claimed invention comprising:

a base **12** forming a floor of a body;  
a front cabinet **20** forming a front of the body;  
a side cabinet **10** forming a side of the body;  
a back cover forming a back side of the body (please see column 2 lines 31-32 wherein the disclosed rear portions is considered to anticipate the claimed back cover);

a top cover **14** forming a top of the body, the top cover comprising:  
a predetermined curvature around the body in all direction (please see column 2 lines 45-49 wherein the disclosed receptacle is considered to anticipate the claimed predetermined curvature);  
a groove **76** provided along the body at a rear side of the top cover;  
a prefabricated hook **77** provided on a front surface of the control panel,  
and inserted to the groove; and  
a fire wall made of metal, and provided at a lower part thereof (please see column 2 line 57 wherein the disclosed rear bulkhead is considered to anticipate the claimed fire wall); and  
a control panel **16** provided on a rear of the top cover. Brenner is also considered to disclose fire wall same curvature as shown in figures **2 & 3** and groove same curvature as shown in figures **3 & 7**.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference B, cited in this application, is considered to disclose a top cover of a clothes dryer with a hook and groove fire wall formation.
